To Whom It May Concern:

I am pleased to recommend Façade Consultants, Inc. to building owners, developers, architects, engineers, contractors and property managers. Over the past four years, I worked directly with Jerry W. Courtney, president of Façade Consultants, Inc. on a 196-luxury condominium unit building located in Ocean City, Maryland.

Façade Consultants, Inc. collaborated with the architect and Owner to identify, select, and design the exterior façade of the ocean front building. The biggest challenge to this project was selecting the right façade materials due to the location of the project. In addition to the services described above, Façade Consultants, Inc. was retained by the Owner to provide testing and inspections services during the construction of the project. The full services provided by Façade Consultants, Inc. are an extreme advantage to any developer or building Owner.

I would highly recommend Façade Consultants, Inc. with confidence to any company. If given the opportunity, we would hire Façade Consultants, Inc. again for future work.

Should you have any further questions, please do not hesitate to contact me at 202-337-1025.

Respectfully,

Eddie Otero
Senior Vice President
